it's good the game me like. I didn't realize a half-hour game could be this boring and repetitive.. Many spoiled kids complaining about graphics, gameplay, etc. For a 41 year-old geek like me, whose first videogame experience was Pong... this game is my childhood dream come true. Maybe it's not the fanciest game I've ever played, but this time I really felt I was in the holodeck. Of course, as with any new technology, there are many challenges and limitations... but we have to consider that only a few years ago affordable VR was a chimera.

I salute developers willing to work with these constraints, trying to turn their vision into reality despite the difficulties, and setting the path for others to profit when things become easier.

. Useless as a point-by-point vector editor. If you delete a point it turns the surrounding points to corners and there's no way to turn them back. Dragging a point doesn't drag it's arm doohickeys with it, so it turns into a different shape. It doesn't shut down properly, so it looks like I've used it for a ton of hours, and steam can't be restarted when it updates unless you kill the logomaker.exe process. I can't imagine what situation this would actually be a good fit for, unless all you really wanted was a clipart cd.. Absolutely brilliant. Buy this game if you are into JRPGs. Trust me.. Very nice riichi implementation! Awesome that is has multiplayer and optional rule sets.

---

Super cool maps for multiplayer ;-). I wanted to give it a thumbs up before i actually started playing but then the system told me i cannot.

For those of you who are still thinking to buy or not - just buy it and enjoy!

Just be reminded the season pass is ridiculously priced so I'll probably pass. (no pun intended). This hidden object game is not one of the adventure/hidden object hybrids; instead it is a pretty much straight hidden object game with just a very minimal story, sort of like the Spin Top hidden objects. A different take in this game is that each hidden object scene has a number of different modes, which are chosen randomly through spinning a wheel. Modes include things like list (regular HOG where you find objects from a list), silhouette (silhouettes only, like what shows in some HOG hints), getting a hint rather than the item name, etc. Once completed, you can go to an Unlimited Hidden Object type of bonus stage where you can choose the modes for the scenes that you did not play before. The game doesn't explain what the Bonus thing that pops up is until you click it--make sure to click it, as this is how you earn hints. Hints are fixed and do not recharge, you must earn the tokens and unfortunately once your stack is maxed out they no longer accumulate.. I'm going to keep this short and just say that an already great space 4x RTS game has been made several times greater by this expansion.

Two new races, new techs, revamped research tree and overall improvement in pretty much every area make this a no-brainer.

If you own the game, get this expansion, there is NOTHING to regret. If you don't own the game, get it and the expansion together and tell your friends about this awesome 4x that far too few people know exists.

Its games like this that are worth supporting way above the AAA publisher titles. A 3-man dev team made something truly amazing.. This is one of my favorite games because you have your own farm and when i play it i remember my dad's farm and how much fun i had there when i was young. Ah... Good old days... I recommend this game to everyone who is patient.. WOW! The game is totally optimized! I can run it on my Pentium 4 PC with Ultra settings 1080p @ 60 FPS
